-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Group II, claims 12-17, in the reply filed on 11/22/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 1-11 have been withdrawn from consideration.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 12-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Baumgartner et al. (US 6567240).

Baumgartner et al. disclose a magnetic recording disk having a substrate coated on both sides with a magnetic recording layer. The reference teaches that the disk is made by a process wherein mechanical grippers hold the substrate during sputtering of the magnetic layers thereby creating identification marks called shadows at various positions along the outer edge of the disk

Art Unit: 1773

wherein sputter deposition was prevented from contacting the disk surface. The shadows are formed as follows:

In Figure 2, reference numbers 51, 53, 55, 57 and 59 correspond to the claimed identification marks. Identification mark 59 (corresponding to the claimed “second” id mark) is closer to mark 51 (corresponding to claimed “first” id mark) than mark 51 is to mark 53 (corresponding to claimed “third” id mark). The figure does not show the corresponding marks on the opposite side of the disk but the reference teaches that they are in the same positions on the opposite side and are used to distinguish the identify the two sides. See col. 1, lines 23-34; col. 2, lines 2-27; col. 3, lines 22-62. With respect to claim 17, the reference teaches that the disk drive platter of the invention is for use in a disk drive using a motor and a read/write head (col. 1, lines 45-57).
